PECHE 444

NOTE

From:	General Secretariat of the Council	
To:	Delegations	
Subject:	Proposal for a Council Regulation fixing for 2025 and 2026 the fishing opportunities for certain fish stocks, applicable in Union waters and, for Union fishing vessels, in certain non-Union waters • Commission services non-paper	

Delegations will find attached the above-mentioned non-paper, as received from the European Commission services.

15107/24 CK/vc 1 LIFE.2 **EN**

COMMISSION SERVICES NON-PAPER

5 NOVEMBER 2024

This document serves as a basis for discussion at the Working Party on Fisheries Policy. It cannot in any circumstances be regarded as the official position of the Commission.

It is intended solely for those to whom it is addressed.

Updates to Commission proposal for a Council Regulation fixing for 2025 and 2026 the fishing opportunities for certain fish stocks, applicable in Union waters and, for Union fishing vessels, in certain non-Union waters [COM(2024) 506 final]

1. AMENDMENTS IN RELATION TO COD IN THE KATTEGAT

EXPLANATORY NOTE

On 28 June 2024, the International Council for the Exploration of the Sea (ICES) published its scientific advice¹ for cod (*Gadus morhua*) in ICES subdivision 21 (Kattegat) for 2025 and 2026. ICES published precautionary advice for that stock and advised that there should be zero catches in 2025 and in 2026.

However, if the TAC for that stock were set at zero, the obligation to land all catches, including by-catches from that stock in mixed fisheries, would give rise to the phenomenon of 'choke species' in the fisheries targeting Norway lobster. To strike a balance between maintaining those fisheries, in view of the potentially severe socio-economic implications of failing to do so, and the need to achieve a good biological status for cod in the Kattegat, taking account of the difficulty of fishing all stocks in a mixed fishery at MSY, it is proposed to set total allowable catches (TAC) exclusively for by-catches of that stock for the fisheries targeting Norway lobster, pursuant to Article 5(3) of Regulation (EU) 2018/973 of the European Parliament and of the Council and Article 16(4) of Regulation (EU) No 1380/2013 of the European Parliament and of the Council in conjunction with Article 2(1) and (5), points (c) and (f), of that Regulation. Specifically, it is proposed to set the level of that by-catch TAC at 72 tonnes (-17% compared to TAC for 2024), corresponding to the level of catches of cod in the Kattegat in 2023. Moreover, as the advice published by ICES is the best available scientific advice for the entire advice period (i.e. 2025 and 2026), it is proposed to set that by-catch TAC for 2025 and for 2026.

In addition, in order to ensure that the fishing mortality of cod in the Kattegat continues to decrease compared to the 2023 level it is proposed to maintain for 2025 and 2026 the existing remedial measures for cod in the Kattegat.

Finally, the proposed EU quota for cod in the Kattegat is to take account of discards based on established exemptions; these quantities will not be landed and counted against the quota, and are therefore deducted from the EU quota. Pending the calculation of those quantities, EU and Member States quotas for cod in the Kattegat are marked 'pro memoria'.

https://doi.org/10.17895/ices.advice.25019213.v1

² 'Choke species' are species with a lack of quota that can cause one or more fishing vessels to stop fishing even if they still have quota for other species.

Regulation (EU) 2018/973 of the European Parliament and of the Council of 4 July 2018 establishing a multiannual plan for demersal stocks in the North Sea and the fisheries exploiting those stocks, specifying details of the implementation of the landing obligation in the North Sea and repealing Council Regulations (EC) No 676/2007 and (EC) No 1342/2008 (OJ L 179, 16.7.2018, p. 1, ELI: http://data.europa.eu/eli/reg/2018/973/oj).

Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy, amending Council Regulations (EC) No 1954/2003 and (EC) No 1224/2009 and repealing Council Regulations (EC) No 2371/2002 and (EC) No 639/2004 and Council Decision 2004/585/EC (OJ L 354, 28.12.2013, p. 22, ELI: http://data.europa.eu/eli/reg/2013/1380/oj).

AMENDMENTS TO THE RECITALS

Recital (11) is replaced by the following:

۷,

(11) For certain stocks, ICES advice remains valid for several years and that advice remains the best available scientific advice for the entire advice period. In those cases, annual TACs covering the entire advice period should be set ('multiannual TAC'). However, if new ICES advice becomes available during that period, it should be ensured that the multiannual TAC remains consistent with the new advice. Moreover, it should be ensured that the annual deductions from the Union quotas, to take account of exemptions from the landing obligation, remain consistent with the available data.

,,

AMENDMENTS TO THE ARTICLES

In Article 19, the square brackets are deleted.

In Article 60, the following point is inserted after point (c):

۲,

(ca) Article 19 shall apply from 1 January 2025 to 31 December 2026.

"

AMENDMENTS TO THE ANNEXES

In Annex IA, Part A, Table 3 is replaced by the following:

"

2. AMENDMENTS IN RELATION TO NORWAY LOBSTER IN THE SKAGERRAK-KATTEGAT, IN THE BAY OF BISCAY AND IN ATLANTIC IBERIAN WATERS

EXPLANATORY NOTE

On 31 October 2024, ICES published its scientific advice for Norway lobster (*Nephrops norvegicus*) for 2025 in: (i) ICES division 3a (Skagerrak and Kattegat), functional units (FUs) 3 and 4⁵; and (ii) ICES divisions 8a and 8b (northern and central Bay of Biscay), FUs 23 and 24⁶. ICES published maximum sustainable yield (MSY) advice for both stocks.

Regarding Norway lobster in ICES division 3a, it is therefore proposed to set the TAC for that stock for 2025 at the lowest value within the range of F_{MSY} (MSY F_{lower})⁷, i.e. 7 732 tonnes (-8% compared to TAC for 2024), in order to support the recovery of cod in the Kattegat, which, according to ICES, is mainly a by-catch of the Norway lobster fishery⁸ and for which ICES advised zero catches for 2025 and for 2026.

Regarding Norway lobster in ICES divisions 8a, 8b, 8d and 8e (Bay of Biscay), it is therefore proposed to set the TAC for that stock for 2025 in line with the MSY advice, i.e. 3 502 tonnes (-39% compared to TAC for 2024).

On 30 June 2022, 30 June 2023 and 31 October 2024, ICES published three relevant pieces of scientific advice for setting the TAC for Norway lobster in ICES subareas 9 and 10 (Iberian waters and waters around the Azores) and EU waters of Committee for Eastern Central Atlantic Fisheries (CECAF) division 34.1.1 (east of Madeira and of the Canary Islands).

First, on 30 June 2022, ICES published its advice for Norway lobster in ICES division 9a, FUs 26 and 27 (Atlantic Iberian waters East, western Galicia, and northern Portugal), for *inter alia* 2025⁹. ICES published MSY advice for that stock and advised that there should be zero catches in *inter alia* 2025.

Second, on 30 June 2023, ICES published its advice for Norway lobster in ICES division 9a, FUs 28 and 29 (Atlantic Iberian waters East and southwestern and southern Portugal) for *inter alia*

15107/24 CK/vc 5 LIFE.2 EN

⁵ https://doi.org/10.17895/ices.advice.25019408.v1

⁶ https://doi.org/10.17895/ices.advice.25019390.v1

As defined in Articles 2(2) and 2(3) of Regulation (EU) 2018/973 and Regulation (EU) 2019/4723 of the European Parliament and the Council establishing the multiannual plans (MAPs) respectively for the North Sea and for the Western Waters*.

^{*} Regulation (EU) 2019/472 of the European Parliament and of the Council of 19 March 2019 establishing a multiannual plan for stocks fished in the Western Waters and adjacent waters, and for fisheries exploiting those stocks, amending Regulations (EU) 2016/1139 and (EU) 2018/973, and repealing Council Regulations (EC) No 811/2004, (EC) No 2166/2005, (EC) No 388/2006, (EC) No 509/2007 and (EC) No 1300/2008 (OJ L 83, 25.3.2019, p. 1, ELI: http://data.europa.eu/eli/reg/2019/472/oj).

⁸ https://doi.org/10.17895/ices.advice.25019213.v1

⁹ https://doi.org/10.17895/ices.advice.19453496

2025¹⁰. ICES published precautionary advice for that stock and advised that catches should be no more than 213 tonnes in inter alia 2025.

Third, on 31 October 2024, ICES published its advice for Norway lobster in ICES division 9a, FU 30 (Atlantic Iberian waters East and Gulf of Cádiz) for 2025¹¹. ICES published precautionary advice for that stock and advised that catches should be no more than 26 tonnes in 2025.

In light of the above, it is therefore proposed to set the TAC for Norway lobster in ICES subareas 9 and 10 and EU waters of CECAF 34.1.1. for 2024 at 239 tonnes (rollover compared to TAC for 2024), corresponding to the sum of the ICES scientific advice for Norway lobster in: (i) FUs 26 and 27; (ii) FUs 28 and 29; and (iii) FU 30. Moreover, it is proposed to set at zero catches in FUs 26 and 27 and to limit catches in FU 30 at 26 tonnes.

Finally, the proposed EU quotas for Norway lobster in the Skagerrak-Kattegat, in the Bay of Biscay and in Atlantic Iberian waters are to take account of discards based on established exemptions; these quantities will not be landed and counted against the quotas, and are therefore deducted from the EU quotas. Pending the calculation of those quantities, EU and Member States quotas for Norway lobster in the Skagerrak-Kattegat, in the Bay of Biscay and in Atlantic Iberian waters are marked 'pro memoria'.

AMENDMENTS TO THE ANNEXES

In Annex IA, Part A, Tables 8, 9 and 12 are replaced by the following:

	26			

,,

3. AMENDMENTS IN RELATION TO UNDULATE RAY IN THE BAY OF BISCAY AND ATLANTIC IBERIAN WATERS

EXPLANATORY NOTE

Undulate ray (*Raja undulata*) in ICES subarea 8 (Bay of Biscay and Cantabrian Sea) and in subarea 9 (Atlantic Iberian waters) are stocks listed in Annex 36, table F, of the Trade and Cooperation Agreement between the European Union and the European Atomic Energy Community, of the one part, and the United Kingdom of Great Britain and Northern Ireland, of the other part¹². That Annex lists stocks that are only present in one Party's waters.

On 4 October 2024, ICES published its scientific advice for undulate ray *inter alia* for 2025 in: (i) ICES divisions 8a and 8b (northern and central Bay of Biscay)¹³; (ii) ICES division 8c (Cantabrian Sea)¹⁴; and (iii) ICES division 9a (Atlantic Iberian waters)¹⁵. Undulate ray in the northern and central Bay of Biscay and in the Cantabrian Sea are managed through a single TAC. Undulate ray in Atlantic Iberian waters is managed by a separate TAC.

Regarding both TACs, it is proposed to set TACs exclusively for by-catches at the same level as for 2024. In addition, it is proposed to establish additional quantities for sentinel fisheries to allow fisheries-based data collection at the same level as for 2024. Those additional quantities aim at improving the fisheries-based scientific data available.

The two by-catch TACs and the additional quantities for sentinel fisheries are: (i) based on the scientific advice for undulate ray respectively in ICES divisions 8a and 8b and division 8c as well as in division 9a; (ii) take into account, for those TACs subject to a survivability exemption from the landing obligation¹⁶, the discard rates and the species survival rates; and (iii) take into account the uncertainties linked to in particular the survival rates.

AMENDMENTS TO THE ANNEXES

Trade and Cooperation Agreement between the European Union and the European Atomic Energy

Community, of the one part, and the United Kingdom of Great Britain and Northern Ireland, of the

other part (OJ L 149, 30.4.2021, p. 10, ELI: http://data.europa.eu/eli/agree_internation/2021/689(1)/oj).

https://doi.org/10.17895/ices.advice.25019615.v1

Survivability exemption pursuant to Article 10 of Commission Delegated Regulation (EU) 2023/2623*.

* Commission Delegated Regulation (EU) 2023/2623 of 22 August 2023 supplementing Regulation (EU)

2019/472 of the European Parliament and of the Council by specifying details of the landing obligation for

certain fisheries in Western Waters for the period 2024-2027 (OJ L, 2023/2623, 22.11.2023, ELI: http://data.europa.eu/eli/reg_del/2023/2623/oj).

https://doi.org/10.17895/ices.advice.25019621.v1

(2)

Shall not apply to undulate ray (*Raja undulata*). This species shall not be targeted in the areas covered by this TAC. In cases where it is not subject to the landing obligation, by-catch of undulate ray in subareas 8 and 9 may only be landed whole or gutted. The catches shall remain under the quotas shown in the table below. These provisions are without prejudice to the prohibitions set out in Union law for the areas specified therein. By-catches of undulate ray shall be reported separately under the codes indicated in the tables below. Within the limits of the abovementioned quotas, no more than the quantities of undulate ray given below may be taken:

Species:	Undulate ray	Zone: Union waters of 8
	Raja undulata	(RJU/8-C.)
Belgium	0	Precautionary TAC

4. AMENDMENTS IN RELATION TO EUROPEAN EEL IN THE NORTH-EAST ATLANTIC

EXPLANATORY NOTE

On 1 November 2024, ICES published its scientific advice for European eel (*Anguilla anguilla*) throughout its natural range for 2025¹⁷. Considering that scientific advice, it is proposed to maintain the existing measures on European eel fisheries in EU marine and brackish waters of ICES subareas 3, 4, 6, 7, 8 and 9 (north-east Atlantic) for 2025.

AMENDMENTS TO THE RECITALS

Recitals (16) and (17) are replaced by the following:

۷,

- (16) In May 2022, ICES noted that despite Member States' efforts for the recovery of European eel (*Anguilla anguilla*), no overall progress had been made in achieving the 40 % silver eel biomass escapement objective across the entire Union, as required by Article 2(4) of Council Regulation (EC) No 1100/2007¹⁸, and that no clear patterns for mortality were observed. In November 2024, ICES advised once again that, when the precautionary approach is applied, there should be zero catches of European eel in all habitats and at all life stages, throughout its natural range, which includes the north-east Atlantic and the Mediterranean. This concerns both recreational and commercial catches and includes catches of glass eels for restocking and aquaculture.
- (17) Council Regulation (EU) 2023/194¹⁹ extended to six months the closure period for any commercial eel fishing activity in Union marine and brackish waters of the north-east Atlantic. It also prohibited all recreational eel fisheries in those waters. It was considered that a six-month closure period would better protect the stock than the Union and national measures implemented until 2022. It was also considered that the extended closure period would further the achievement of the escapement objective of at least 40 % of silver eels set out in Article 2(4) of Regulation (EC) No 1100/2007. Council Regulation (EU) 2024/257²⁰

18 Co

15107/24 CK/vc 10 LIFE.2 **EN**

^{17 [}X]

Council Regulation (EC) No 1100/2007 of 18 September 2007 establishing measures for the recovery of the stock of European eel (OJ L 248, 22.9.2007, p. 17, ELI: http://data.europa.eu/eli/reg/2007/1100/oj).

Council Regulation (EU) 2023/194 of 30 January 2023 fixing for 2023 the fishing opportunities for certain fish stocks, applicable in Union waters and, for Union fishing vessels, in certain non-Union waters, as well as fixing for 2023 and 2024 such fishing opportunities for certain deep-sea fish stocks (OJ L 28, 31.1.2023, p. 1, ELI: http://data.europa.eu/eli/reg/2023/194/oj).

Council Regulation (EU) 2024/257 of 10 January 2024 fixing for 2024, 2025 and 2026 the fishing opportunities for certain fish stocks, applicable in Union waters and, for Union fishing vessels, in certain non-Union waters, and amending Regulation (EU) 2023/194 (OJ L, 2024/257, 11.1.2024, ELI: http://data.europa.eu/eli/reg/2024/257/oj).

maintained those measures while clarifying the criteria for setting the closure period and the possible derogation for continued limited eel fisheries during the eel migration period. Given the continued critical state of the European eel, it is appropriate to maintain those measures in 2025.

"

In recital (18), the first sentence in square brackets and the square brackets are deleted.

AMENDMENTS TO THE ARTICLES

In Article 13, the square brackets are deleted.

5. AMENDMENTS IN RELATION TO NAFO

EXPLANATORY NOTE

At its 46th annual meeting in 2024, the Northwest Atlantic Fisheries Organisation (NAFO) adopted fishing opportunities for certain stocks in the NAFO Convention area for 2025. It also maintained for 2025 measures that are functionally linked to the fishing opportunities of shortfin squid (*Illex* illecebrosus) in NAFO subareas 3 and 4 and yellowtail flounder (Limanda ferruginea) in NAFO divisions 3LNO, aiming at minimising the levels of by-catches of non-target species and without which the fishing opportunities for those stocks would have to be reduced to protect the non-target species. It is therefore proposed to implement those measures in EU law.

AMENDMENTS TO THE RECITALS

Recital (36) is replaced by the following:

(36)At its 46th annual meeting in 2024, the Northwest Atlantic Fisheries Organisation (NAFO) adopted fishing opportunities for certain stocks in the NAFO Convention area for 2025. It also maintained for 2025 measures that are functionally linked to the fishing opportunities of shortfin squid (Illex illecebrosus) in NAFO subareas 3 and 4 and yellowtail flounder (Limanda ferruginea) in NAFO divisions 3LNO, aiming at minimising the levels of bycatches of non-target species and without which the fishing opportunities for those stocks would have to be reduced to protect the non-target species. Those measures should be implemented in Union law.

AMENDMENTS TO THE ARTICLES

In Chapter III, the following section is inserted after Section 1:

SECTION 1A NAFO REGULATORY AREA

Article 23a Recovery measures for cod in NAFO divisions 2J3KL

Fishing vessels fishing for cod in the part of NAFO divisions 2J3KL covered by the NAFO Regulatory Area shall use gear with the following minimum mesh sizes:

15107/24 12 CK/vc EN

- (a) when using a sorting grid, as defined in Article 14 of Regulation (EU) 2019/833 of the European Parliament and of the Council²¹, 130 mm; or
- 150 mm. (b)

In Article 60, the following point is inserted after point (d):

۲,

(da) Article 23a shall apply from 1 July 2025 to 30 June 2026 or until the date on which a Commission Delegated Regulation amending Regulation (EU) 2019/833 concerning recovery measures for cod in NAFO divisions 2J3KL becomes applicable, whichever is earlier.

AMENDMENTS TO THE ANNEXES

Annex IC is replaced by the following:

TAC	15 810	Article 4 of Regulation (EC) No 847/96 shall not apply				

Catches to be counted against this shared quota shall be reported separately (SQI/N34_AMS).

available to Canada and the Member States except Estonia, Latvia, Lithuania and Poland.

Corresponds to the sum of the quotas of Estonia, Latvia, Lithuania and Poland and the unspecified share

No directed fisheries are permitted under this quota. This species shall only be taken as by-catch within the following limits: a maximum of 2 500 kg or 10 %, whichever is greater. However, if the Union is assigned an 'Others' quota, once the 'Others' quota is exhausted, the by-catch limits shall be as follows: a maximum of 1 250 kg or 5 %, whichever is greater.

However, if following quota transfers or exchanges or charter, directed fisheries are conducted, the following shall apply:

15107/24 CK/vc 15 LIFE.2 EN

- (a) a by-catch of 15% of American plaice is permitted. However, if a fishing vessel is carrying an observer:
 - (i) this maxima shall be 2 900 kg or 15 % of American plaice, whichever the greater; and (ii) a vessel may exceed the maxima referred to in point (i) for by-catches of American plaice retained on board during the first 9 fishing days in the NAFO Regulatory Area, provided that American plaice by-catch represents 15 % or less by the end of that period or when the vessel leaves the NAFO Regulatory Area, whichever occurs first;
- (b) the first two times that catches of American plaice comprise the largest percentage by weight of the total catch in a haul, such catches shall be considered as incidental catch, but the vessel shall immediately move a minimum of 10 nautical miles from any position of the previous haul throughout the subsequent haul.

6. AMENDMENTS IN RELATION TO COD IN NAFO DIVISIONS 2.13KL

EXPLANATORY NOTE

Council Regulation (EU) 2024/257²² set the TAC and EU quota for cod (*Gadus morhua*) in NAFO divisions 2J, 3K and 3L ('2J3KL') for 2024 at zero, in line with the decision taken by NAFO at its 2023 annual meeting.

In June 2024, following the publication of updated scientific advice²³, Canada established for its fishing vessels a catch limit of 18 000 tonnes for cod in NAFO divisions 2J3KL for the period from 1 July 2024 to 30 June 2025. In accordance with its rules, NAFO is to establish for that stock and for that period a TAC and a catch limit for other NAFO Contracting Parties to be fished in the part of that area covered by the NAFO Regulatory Area. That catch limit for cod in NAFO divisions 2J3KL for other NAFO Contracting Parties is to be established at a level which results in the catch limit established by Canada corresponding to 95% of the TAC and the catch limit for other NAFO Contracting Parties corresponding to 5% of the TAC (i.e. 947 tonnes).

During its 2024 annual meeting, NAFO established a revised allocation key for that catch limit for other NAFO Contracting Parties for the period from 1 July 2024 to 30 June 2025, including an increased EU share of 3,88% of the TAC, based on catches of the concerned Contracting Parties in a reference period of 1973-1976. In addition, NAFO adopted a TAC and an EU quota for cod in the part of NAFO divisions 2J3KL covered by the NAFO Regulatory Area for the period of 1 July 2024 to 30 June 2025. Moreover, NAFO established recovery measures for cod in that area. However, those measures by NAFO only entered into force on 11 October 2024, without retroactive application.

It is therefore proposed to implement the TAC and EU quota and those functionally linked recovery measures in EU law as from 1 January 2025. Pending an agreement between Member States on a new allocation key for that EU quota to Member States, the Member States quotas are marked 'pro memoria'.

AMENDMENTS TO THE RECITALS

The following recitals are inserted after recital (45):

۲,

(45a) At its 46th annual meeting in 2024, NAFO decided to reopen the fishery for cod (*Gadus morhua*) in the part of NAFO divisions 2J, 3K and 3L ('2J3KL') covered by the NAFO Regulatory Area, following the adoption by Canada of a catch limit of 18 000 tonnes for its fishing vessels in NAFO divisions 2J, 3K and 3L for the period from 1 July 2024 to 30 June 2025. In particular, NAFO adopted a TAC and a Union quota for that stock for the period of 1 July 2024 to 30 June 2025 at the level of 735 tonnes, based on a revised allocation key in NAFO. In addition, NAFO established recovery measures for that stock for that period. The

15107/24 CK/vc 20 LIFE.2 EN

Council Regulation (EU) 2024/257 of 10 January 2024 fixing for 2024, 2025 and 2026 the fishing opportunities for certain fish stocks, applicable in Union waters and, for Union fishing vessels, in certain non-Union waters, and amending Regulation (EU) 2023/194 (OJ L, 2024/257, 11.1.2024, ELI: http://data.europa.eu/eli/reg/2024/257/oj).

https://www.dfo-mpo.gc.ca/csas-sccs/Publications/SAR-AS/2024/2024_049-eng.html

TAC, Union quota and recovery measures entered into force on 11 October 2024, without retroactive application. Those measures should be implemented in Union law.

(45b) Regulation (EU) 2024/257 should therefore be amended accordingly.

AMENDMENTS TO THE ARTICLES

In Title IV, the following article is inserted before Article 58.

"Article 57a Amendment of Regulation (EU) 2024/257

Regulation (EU) 2024/257 is amended as follows:

(1) In Chapter III, the following section is inserted after Section 1:

۷,

SECTION 1A NAFO REGULATORY AREA

Article 23a Recovery measures for cod in NAFO divisions 2J3KL

Fishing vessels fishing for cod in the part of NAFO divisions 2J3KL covered by the NAFO Regulatory Area shall use gear with the following minimum mesh sizes:

- when using a sorting grid, as defined in Article 14 of Regulation (EU) 2019/833 of the (a) European Parliament and of the Council²⁴, 130 mm; or
- 150 mm. (b)

In Article 59, the following point is inserted after point (d): (2)

15107/24 CK/vc 21 LIFE.2

²⁴ Regulation (EU) 2019/833 of the European Parliament and of the Council of 20 May 2019 laying down conservation and enforcement measures applicable in the Regulatory Area of the Northwest Atlantic Fisheries Organisation, amending Regulation (EU) 2016/1627 and repealing Council Regulations (EC) No 2115/2005 and (EC) No 1386/2007 (OJ L 141, 28.5.2019, p. 1, ELI: http://data.europa.eu/eli/reg/2019/833/oj).

Article 23a shall apply from 1 January 2025 to 30 June 2025 or until the date on which a (da) Commission Delegated Regulation amending Regulation (EU) 2019/833 concerning recovery measures for cod in NAFO divisions 2J3KL becomes applicable, whichever is earlier.

In Annex IC, Table 1 is replaced by the following:

		Table	1

(1)	This quota shall apply from 1 June 2025.	January 2024	4 to 30 June 2025. It may only be fished from 1 January 2025 to 30
(2)	No directed fisheries are permitted under this quota between 00:00 UTC 15 April 2025 and 23:59 UTC 30 June 2025. During this period, this species shall only be taken as by-catch within the following limits: a maximum of 1 250 kg or 5 %, whichever is greater.		

7. AMENDMENTS IN RELATION TO CCSBT

EXPLANATORY NOTE

At its 2023 annual meeting, the Commission for the Conservation of Southern Bluefin Tuna (CCSBT) adopted the TAC for Southern bluefin tuna (*Thunnus maccoyii*) for a three-year period from 2024 to 2026. It is therefore proposed to implement that measure in EU law for 2025.

AMENDMENTS TO THE RECITALS

Recital (33) is replaced by the following:

"

(33) At its 2023 annual meeting, the Commission for the Conservation of Southern Bluefin Tuna (CCSBT) adopted the TAC for Southern bluefin tuna (*Thunnus maccoyii*) for a three-year period from 2024 to 2026. That measure should be implemented in Union law for 2025.

"

AMENDMENTS TO THE ANNEXES

Annex IF is replaced by the following:

"
