SECTION C

OTHER ENTITIES

1. Unless otherwise provided for in this Annex and subject to the Notes to this Section and the General Notes in Section H, Chapter 21 (Public Procurement) applies to the procuring entities covered by paragraph 2 if the value of the supplies is equal to or exceeds the following thresholds:

- (a) 400 000 SDR for goods specified in Section D and services specified in Section E; and
- (b) 5 000 000 SDR for construction works specified in Section F.

2. This Section covers all procuring entities whose procurement is covered by Directive 2014/25/EU of the European Parliament and the Council⁴ which are contracting authorities pursuant to that Directive, including those covered under Section A or B, or qualify as public undertakings⁵, and which have as one of their activities any of those referred to below or any combination thereof:

- (a) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of drinking water or the supply of drinking water to such networks;
- (b) the provision or operation of fixed networks intended to provide a service to the public in connection with the production, transport or distribution of electricity or the supply of electricity to such networks;
- (c) the provision of airport or other terminal facilities to carriers by air;

⁴ Directive 2014/25/EU of the European Parliament and of the Council of 26 February 2014 on procurement by entities operating in the water, energy, transport and postal services sectors and repealing Directive 2004/17/EC (OJ EU L 94, 28.3.2014, p. 243).

⁵ According to Directive 2014/25/EU, "public undertaking" means any undertaking over which the contracting authorities may exercise directly or indirectly a dominant influence by virtue of their ownership of it, their financial participation therein, or the rules which govern it. A dominant influence on the part of the contracting authorities shall be presumed when those authorities, directly or indirectly, in relation to an undertaking:

- (a) hold the majority of the undertaking's subscribed capital, or
- (b) control the majority of the votes attaching to shares issued by the undertaking, or
- (c) can appoint more than half of the undertaking's administrative, management or supervisory body.

- (d) the provision of maritime or inland port or other terminal facilities to carriers by sea or inland waterway; or
- (e) the provision or operation of networks⁶ providing a service to the public in the field of transport by urban railway, automated systems, tramway, trolley bus, bus or cable.

NOTES TO SECTION C

1. Contracts awarded for the pursuit of an activity listed in subparagraphs 2(a) to 2(e) of Section C are not covered by Chapter 21 (Public Procurement) if the activity is exposed to competition in the market concerned.

2. Chapter 21 (Public Procurement) does not apply to contracts awarded by procuring entities covered under this Section:

- (a) for the purchase of water and for the supply of energy or of fuels for the production of energy;
- (b) for purposes other than the pursuit of their activities as listed in subparagraphs 2(a) to 2(e) of Section C or for the pursuit of such activities in a country outside the European Economic Area; or

⁶ As regards transport services, a network shall be considered to exist where the service is provided under operating conditions laid down by a competent authority of a Member State of the European Union, such as conditions on the routes to be served, the capacity to be made available or the frequency of the service.

(c) for purposes of re-sale or hire to third parties, provided that the procuring entity enjoys no special or exclusive right to sell or hire the subject of such contracts and other entities are free to sell or hire it under the same conditions as the procuring entity.

3. The supply of drinking water or electricity to networks which provide a service to the public by a procuring entity other than a contracting authority shall not be considered as an activity within the meaning of Note 2(a) or 2(b) if:

(a) the production of drinking water or electricity by the entity concerned takes place because its consumption is necessary for carrying out an activity other than that listed in subparagraphs 2(a) to 2(e) of Section C; and

(b) supply to the public network depends only on the entity's own consumption and has not exceeded 30 % of the entity's total production of drinking water or energy, having regard to the average for the preceding three years, including the current year.

4. Provided that at least 80 % of the average turnover of the affiliated enterprise with respect to services or supplies for the preceding three years derives respectively from the provision of such services or supplies to enterprises with which it is affiliated⁷, Chapter 21 (Public Procurement) does not apply to service or supply contracts awarded:

- (a) by a procuring entity to an affiliated enterprise⁸; or
- (b) by a joint venture, formed exclusively by a number of procuring entities for the purpose of carrying out activities within the meaning of subparagraphs 2(a) to 2(e) of Section C, to an enterprise which is affiliated with one of these procuring entities.

⁷ When, because of the date on which an affiliated enterprise was created or commenced activities, the turnover is not available for the preceding three years, it will be sufficient for that enterprise to show that the turnover referred to in this note is credible, in particular by means of business projections.

⁸ The term "affiliated enterprise" means any enterprise the annual accounts of which are consolidated with those of the procuring entity in accordance with the requirements of Directive 2013/34/EU of the European Parliament and of the Council of 26 June 2013 on the annual financial statements, consolidated financial statements and related reports of certain types of undertakings, amending Directive 2006/43/EC of the European Parliament and of the Council and repealing Council Directives 78/660/EEC and 83/349/EEC, or in case of entities not subject to that Directive, any enterprise over which the procuring entity may exercise, directly or indirectly, a dominant influence, or which may exercise a dominant influence over the procuring entity, or which, in common with the procuring entity, is subject to the dominant influence of another enterprise by virtue of ownership, financial participation, or the rules which govern it.

5. Provided that the joint venture has been set up to carry out the activity concerned over a period of at least three years and the instrument setting up the joint venture stipulates that the procuring entities, which form it, will be part thereof for at least the same period, Chapter 21 (Public Procurement) does not apply to contracts awarded:

4. Chapter 21 (Public Procurement) applies to build-operate-transfer contracts and public works concessions contracts only to the extent that those contracts are covered under Section G (Public-Private Partnership Projects).

Set Aside of Procurement Contracts

5. Notwithstanding Chapter 21 (Public Procurement), Mexico may set aside procurement contracts from the obligations of Chapter 21 (Public Procurement) subject to the following conditions:

- (a) the total value of the procurement contracts set aside may not exceed the Mexican peso equivalent of USD 2 328 000 000 in each calendar year from the date of entry into force of this Agreement, which may be allocated by all procurement entities, including PEMEX and CFE;
- (b) the total value of procurement contracts under any single FSC class (or other classification system agreed by the Parties) that may be set aside under this paragraph in any year shall not exceed 10 % of the total value of contracts that may be set aside under this paragraph for that year;

- (c) no entity subject to subparagraph (a) may set aside contracts in any calendar year of a value of more than 20 % of the total value of contracts that may be set aside for that year; and
- (d) the total value of the contracts set aside by PEMEX and CFE may not exceed the Mexican peso equivalent of USD 466 000 000 in each calendar year.

6. Beginning in January of the calendar year following the year of the entry into force of this Agreement, the USD values referred to in paragraph 5 shall be adjusted annually for cumulative inflation, based on the implicit price deflator for the United States Gross Domestic Product (USGDP) or any successor index published by the Council of Economic Advisors in Economic Indicators.

The dollar values adjusted for cumulative inflation up to January of each calendar year following 2018 shall be equal to the original dollar values multiplied by the ratio of the implicit USGDP price deflator or any successor index published by the Council of Economic Advisors in Economic Indicators, current as of January of that year, to the implicit USGDP price deflator or any successor index published by the Council of Economic Advisors in Economic Indicators, current as of January 2018, provided that those price deflators have the same base year.

The resulting adjusted dollar values shall be rounded to the nearest million dollars. Mexico shall notify to the European Union the adjusted dollar values during the months of January of the year the adjustment shall take effect.

7. If Mexico exceeds in a given year the total value of contracts it may set aside in accordance with paragraph 5, Mexico shall consult with the European Union with a view to agreeing on a compensation in the form of additional procurement opportunities during the following year. The consultations shall be without prejudice to the rights of the other Party under Chapter 31 (Dispute Settlement).

Local Content Requirements of PEMEX and CFE

8. Notwithstanding Chapter 21 (Public Procurement), PEMEX and CFE may impose a local content requirement of no more than:

- (a) 40 % for labour-intensive turnkey or major integrated projects; or
- (b) 20 % for capital-intensive turnkey or major integrated projects.

9. For the purposes of this paragraph, "turnkey or major integrated project" means a construction, supply or installation project undertaken by a prime contractor pursuant to a right granted by an entity with respect to which:

- (a) the prime contractor is vested with the authority to select the general contractors or subcontractors;
- (b) neither PEMEX nor CFE fund the project;

- (c) the prime contractor bears the risks associated with non-performance; and
- (d) the facility will be operated by an entity or through a procurement contract of that entity.

10. Any lowering of that percentage of contract value decided by PEMEX or CFE as a result of an international agreement or law of Mexico, regulation or policy, shall replace the above mentioned percentages on a permanent basis. When applying this Note, procuring entities of Mexico shall treat European Union bidders no less favourable than Mexican or other third country bidders.

11. The term "local content" means the costs for components, sub-components and raw materials produced in Mexico, including the costs of labour or other related services such as after-sale and maintenance services, as determined in the tender. It also includes all costs related to a final assembly in Mexico. The bidder shall have the right to determine which part of the contract value will be fulfilled through the use of Mexican acquired value, on the basis of possibilities set out in the tender notice.

12. The eligible costs shall provide reasonable flexibility for a successful bidder to source the contract value on competitive terms from Mexican suppliers, including with respect to price and quality. PEMEX and CFE shall not split contracts with the purpose of restricting the choice of eligible costs of the bidder.

13. The procuring entities shall clearly and objectively indicate the existence of local content requirements and attached conditions in both the tender notices and the contract.

14. Ten years after entry into force of this Agreement, Mexico shall submit a report regarding the application of this paragraph to the Sub-Committee on Public Procurement established by subparagraph 1(j) of Article 33.4.1 (Sub-Committees and Other Bodies).

15. Nothing in Chapter 21 (Public Procurement) shall be construed as requiring PEMEX to enter into risk-sharing contracts.

Thresholds Adjustment Formula

16. The threshold values expressed in USD in Sections A and C of this Section shall be adjusted for every calendar year to inflation at the rate determined for the United States of America in accordance with the thresholds adjustment formula set out in paragraph 1 of Section G of Annex 13-A (Schedule of Mexico) to Chapter 13 (Government Procurement) of the USMCA.

Mexico shall notify the European Union the inflation rate determined by the United States of America no later than 18 November of the year preceding the adjustment shall take effect.

17. Mexico shall calculate and convert the value of the thresholds into Mexican pesos using the conversion rate of the Banco de México (Bank of Mexico). That conversion rate shall be the value of the Mexican peso in terms of the USD on 1 December and on 1 June of each year, or the first working day thereafter. The conversion rate of 1 December shall apply from 1 January to 30 June of the following year, and the conversion rate as of 1 June shall apply from 1 July to 31 December of that year. Mexico shall notify to the European Union the conversion rate and the determined threshold values in Mexican pesos prior to their application.

18. Information related to thresholds shall be published on the following website:

MAIN ELEMENTS OF THE OPPOSITION PROCEDURE

SECTION A

MAIN ELEMENTS OF THE OPPOSITION PROCEDURE
IN THE EUROPEAN UNION

When carrying out an opposition procedure as referred to in Article 25.33, the European Union shall ensure the following.

1. Any natural or legal person except those established or resident in Mexico, having a legitimate interest, shall be invited, by publication of a notice, to oppose the envisaged protection of the geographical indication concerned by lodging a duly substantiated statement. The notice shall include the name(s) with the corresponding transcription into Latin characters, and the product type of the geographical indication to be protected.
2. Statements of opposition shall reach the European Commission no later than two months after the date of publication of the notice.

3. Statements of opposition shall be admissible only if they are received within the time-limit set out above and if they show that:

- (a) the protection of the name proposed would conflict with the name of a plant variety, including a wine grape variety or an animal breed, and as a result is likely to mislead the consumer as to the true origin of the good;
- (b) there is a homonymous name which is likely to mislead the consumer into believing that the good comes from another territory;
- (c) the protection of the name proposed would in the light of a trademark's reputation and renown and the length of time it has been used, be likely to mislead the consumer as to the true identity of the good;
- (d) the protection of the name proposed would jeopardise the existence of an entirely or partly identical name or of a trademark or the existence of a good which has been legally on the market for at least five years preceding the date of the publication of the notice; or
- (e) the information provided by the opponent indicates that the name, for which protection and registration is considered, is generic.

4. The elements of the opposition procedure referred to above shall be evaluated in relation to the territory of the European Union, which in the case of intellectual property rights refers only to the territory or territories where those rights are protected.

2. the name is identical to, or has a degree of similarity so as to lead to confusion with ("semejante en grado de confusion"), a name that is subject to a pending pre-existing good faith application for recognition as appellation of origin or geographical indication for the same or a similar good;
3. the name is generic or is commonly used in the territory of Mexico for the good that is intended to be protected, or, has become a common or generic element of that good in common or commercial language;

4. the name, considering all its characteristics, constitutes a description of the good that it seeks to protect. Those characteristics shall include descriptive or indicative words which usually serve to designate species, quality, quantity, composition, destination or value of a good in the course of trade;
5. the name is identical to, or has a degree of similarity so as to lead to confusion with ("semejante en grado de confusion"), a registered trademark or commercial name registered in Mexico, applicable to the same or similar goods;
6. the name is identical to, or has a degree of similarity so as to lead to confusion with ("semejante en grado de confusion"), a pending pre-existing good faith application for trademarks or commercial names;
