SPECIAL PROVISIONS ON ADMINISTRATIVE COOPERATION

1. The Parties shall cooperate in combatting operations in breach of customs legislation related to the preferential tariff treatment granted under Chapter 2 (Trade in Goods) in accordance with Chapter 3 (Rules of Origin and Origin Procedures) and the Annex on Mutual Administrative Assistance in Customs Matters referred to in paragraph 3 of Article 4.11 (Customs Cooperation and Mutual Administrative Assistance).
2. The definitions of the Annex on Mutual Administrative Assistance in Customs Matters apply to this Annex.
3. The procedure set out in paragraphs 4 to 8 applies if a Party has made a finding, on the basis of objective and verifiable information, including the results of verifications of origin or of requests for assistance and, if necessary, of enquiry visits:
 - (a) that breaches in customs legislation related to preferential tariff treatment granted under Chapter 2 (Trade in Goods) have been committed repeatedly; or
 - (b) that in cases of operations in breach of customs legislation the other Party repeatedly refuses or otherwise fails to comply with obligations referred to in paragraph 1.

4. The Party, which has made a finding referred to in paragraph 3 shall raise the issue with the Sub-Committee on Customs, Trade Facilitation and Rules of Origin with a view to reaching a solution acceptable to both Parties.

5. If the Parties fail to reach an acceptable solution within three months after raising the issue in accordance with paragraph 4 the Party which has made the finding may notify the Joint Committee and enter into consultations on the basis of all relevant information, with a view to reaching a solution acceptable to both Parties.

6. If the Parties fail to reach an acceptable solution within three months following the notification referred to in paragraph 5, the Joint Committee may take a decision to temporarily withdraw preferential tariff treatment of the goods concerned.

7. If the temporary withdrawal of preferential tariff treatment decided by the Joint Committee is effective in preventing operations in breach of customs legislation referred to in paragraph 1, the Party, which made the finding, shall withdraw the measures it had adopted to ensure compliance with its customs legislation.

8. The temporary withdrawal shall apply for a period necessary to counteract the operations in breach of customs legislation and in any case no longer than six months. If the conditions that gave rise to the initial suspension persist after the expiry of the six-month period, the Joint Committee may decide to renew the withdrawal. Any temporary suspension shall be terminated on a date not later than two years from the initial suspension unless the Joint Committee decides that the conditions that gave rise to the initial suspension persist.

9. Each Party shall publish the decision of the Joint Committee concerning the temporary withdrawal pursuant to this Annex, as well as any other notices or notifications to traders in accordance with its internal procedures.

PHARMACEUTICALS

1. Each Party shall comply with the obligations set out in the TBT Agreement with respect to a marketing authorisation, notification procedure or other regulatory requirements that either Party prepares, adopts or applies to pharmaceutical products and which do not fall within the scope of the definition of a technical regulation or conformity assessment procedure.
2. Each Party shall use international standards, practices and guidelines for pharmaceutical products and medical devices, including those developed by the World Health Organization (WHO), the Organization for Economic Cooperation and Development (OECD), the International Council for Harmonization of Technical Requirements for Pharmaceuticals for Human Use (ICH) and the Pharmaceutical Inspection Convention and Pharmaceutical Inspection Co-operation Scheme (PIC/S) as a basis for their technical regulations, except in those cases, duly substantiated on the basis of scientific and technical information, if such international standards, practices or guidelines would be ineffective or inappropriate for the fulfilment of the legitimate objectives pursued.

3. The Parties recognise that their full participation in the relevant bodies referred to in paragraph 2 facilitates regulatory cooperation between each other. The Parties shall endeavour to reach a decision on the conclusion of a Mutual Recognition Agreement (MRA) on good manufacturing practices in the future. In that context, the Parties recognise the importance of demonstrating a good record of implementation of international standards and building confidence between each other. The Committee on Trade in Goods shall meet to monitor progress every two years. In those meetings, the Parties shall discuss the development of their respective regulatory frameworks and how to protect the exchange of information. The Parties shall also enter into a dialogue to discuss inspection procedures and assess the savings that an MRA would generate.

MOTOR VEHICLES AND EQUIPMENT AND PARTS THEREOF

1. This Annex applies to standards, technical regulations and conformity assessment procedures adopted or maintained by a Party at its central level of government relating to the safety and emissions of new motor vehicles or new motor vehicle equipment as defined by its laws and regulations.
2. The Parties shall endeavour to eliminate unnecessary barriers to trade and to enhance regulatory cooperation, in accordance with Chapter 9 (Technical Barriers to Trade), while recognising the right of each Party to determine its desired level of health, safety, environmental and consumer protection.

Market Access

3. Each Party shall accept on its market any new motor vehicles or new motor vehicle equipment as defined by its laws and regulations, provided the manufacturer has certified in accordance with the importing Party's applicable procedures, that the vehicle or equipment complies with the safety standards and technical regulations applicable in the importing Party¹.

¹ For greater certainty, nothing in this paragraph shall be construed as preventing a Party from also permitting the acceptance on its market of new motor vehicles or new motor vehicle equipment certified in accordance with safety and emission standards of a third country or from requiring certification of compliance with any existing motor vehicle safety and emission standards that a Party maintains on the date of entry into force of this Agreement.

4. The Parties acknowledge that Mexico has incorporated in its technical regulations NOM-194-SCFI and NOM-042- SEMARNAT the technical regulations of the European Union and the Economic Commission for Europe of the United Nations (UNECE), including their corresponding tests-reports and type-approval certificates, listed in Appendix 2-G-1 (Certificates and Test Reports Accepted by Mexico).

5. Mexico maintains the right to modify its technical regulations NOM-194-SCFI and NOM-042- SEMARNAT, including the incorporation of technical regulations of the European Union or UNECE. During the development of such changes, Mexico shall inform the European Union and, upon request, provide information on the rationale for those changes. Mexico shall continue to recognise the technical regulations listed in Appendix 2-G-1 (List of Certificates and Test Reports Accepted by Mexico), as well as their updates, unless such recognition would provide for a lower level of safety or environmental protection than the amendments introduced, or would compromise any commitments under the USMCA, or would be against Mexico's legitimate policy objectives.

6. Whenever Mexico revises its technical regulations relating to the approval of motor vehicles and their equipment, the Parties shall endeavour to consult each other, in accordance with the relevant provisions of Chapter 9 (Technical Barriers to Trade), with a view to determining whether the technical regulations listed in Appendix 2-G-2 (List of Additional Certificates or Test Reports) could be included in Appendix 2-G-1 (List of Certificates and Test Reports Accepted by Mexico).

7. Each Party shall endeavour to permit the importation and placing on its market of products incorporating a new technology or a new feature that the importing Party has not yet regulated, unless it has reasonable doubts about the safety of the product, based on scientific or technical information demonstrating that this new technology or new feature creates a risk for human health, safety or the environment. The Party refusing the importation and placing on its market shall notify that decision to the other Party as soon as possible.

8. A Party shall not nullify or impair the benefits accruing to the other Party under this Annex through regulatory measures specific to the products covered. This obligation is without prejudice to the right of a Party to adopt measures necessary for safety and the protection of the environment or public health.

Joint Cooperation

9. The Parties shall cooperate and exchange information on any matters relevant for the implementation of this Annex within the Committee on Trade in Goods.

10. With the purpose of promoting regulatory convergence, the Parties shall exchange information, to the extent practicable, on their respective technical regulations related to motor vehicle safety and environmental protection.

11. Appendices 2-G-1 (List of Certificates and Test Reports Accepted by Mexico) and 2-G-2 (List of Additional Certificates or Test Reports) constitute an integral part of this Annex.

PRODUCT SPECIFIC RULES OF ORIGIN

SECTION A

INTRODUCTORY NOTES

Note 1

General Principles

1.1 This Section sets out the rules for the application of the conditions in Sections B and C of this Annex as provided for in subparagraph 1(c) of Article 3.2 (General Requirements).

1.2 For the purposes of this Annex, the requirements for a product to be considered as originating in accordance with subparagraph 1(c) of Article 3.2 (General Requirements) are a change in tariff classification, a production process, a maximum value or weight of non-originating materials or any other requirement specified in this Annex.

1.3 Reference to weight in a product specific rule of origin means the net weight, which is the weight of a material or a product not including the weight of packaging.

Note 2

Structure of the List of Product Specific Rules of Origin

- 2.1 Notes on sections, chapters, headings or subheadings, if applicable, shall be read in conjunction with the product specific rules of origin for the relevant section, chapter, heading or subheading.
- 2.2 Each product specific rule of origin set out in the second column of the list of Section B applies to the corresponding product indicated in the first column of that list.
- 2.3 If a product is subject to alternative product specific rules of origin, the product shall be considered as originating in a Party if it satisfies one of the alternatives.
- 2.4 If a product is subject to a product specific rule of origin that includes multiple requirements, the product shall be considered as originating in a Party only if it satisfies all of the requirements.
- 2.5 If a product specific rule of origin specifically excludes certain materials of the Harmonized System, it requires that the excluded materials be originating in a Party.

Example: When the rule of origin for heading 3505 requires "CTH except from heading 1108" then, materials classified under heading 1108 (starches, inulin) must be originating.

Note 3

Application of the Product Specific Rules of Origin

3.1 Paragraph 2 of Article 3.2 (General Requirements), concerning products having acquired originating status which are used in the production of other products, applies whether or not this status has been acquired inside the same factory in a Party where these products are used.

3.2 If a product specific rule of origin provides that a specified non-originating material shall not be used or that the value or weight of a specified non-originating material shall not exceed a specific threshold, these conditions do not apply to non-originating materials classified elsewhere in the Harmonized System.

Example: When the rule for Chapter 19 requires that "that the total weight of non-originating materials of headings 1006, 1101, 1102 or 1104 to 1108 used does not exceed 20 % by weight of the final product", the use of non-originating cereals of Chapter 10, other than rice of heading 1006, is not limited.

3.3 If a product-specific rule of origin provides that a product shall be produced from a particular material, this does not prevent the use of other materials which are unable to satisfy that rule because of their inherent nature.

Note 4

Definitions

4.1 For the purposes of this Annex:

- (a) "CC" means production from non-originating materials of any chapter, except that of the product, or a change to the chapter, heading or subheading from any other chapter so that all non-originating materials used in the production of the product must undergo a change in tariff classification at the two-digit level of the Harmonized System (a change in chapter);
- (b) "CTH" means production from non-originating materials of any heading, except that of the product, or a change to the chapter, heading or subheading from any other heading so that all non-originating materials used in the production of the product undergo a change in tariff classification at the four-digit level of the Harmonized System (a change in heading);
- (c) "CTSH" means production from non-originating materials of any subheading, except that of the product, or a change to the chapter, heading or subheading from any other subheading so that all non-originating materials used in the production of the product undergo a change in tariff classification at the six-digit level of the Harmonized System (a change in subheading);
- (d) "customs value" means the value of a good determined in accordance with the Customs Valuation Agreement;

- (e) "EXW" or "ex-works price" means the price paid for the product ex-works to the manufacturer in a Party where the last working or processing was carried out and shall, in all cases, include the value of all the materials used and all other costs related to its production, minus any internal taxes returned or repaid when the product obtained is exported, even if the price is not known, is uncertain, or does not reflect all costs related to the production of the product;

if the last working or processing has been subcontracted to a manufacturer in a Party the term manufacturer may refer to the enterprise that has made use of the subcontractor;

- (f) "MaxNOM" means the maximum value of non-originating materials expressed as a percentage and shall be calculated according to the following formula:

$$\text{MaxNOM}(\%) = \frac{\text{VNM}}{\text{EXW}} \times 100$$

- (g) "NOM" means production from non-originating materials of any heading; and
- (h) "VNM" means the value of non-originating materials used in the manufacture of the product which is its customs value at the time of importation including freight, insurance if appropriate, packing and all the other costs incurred in transporting the materials to the importation port in the Party where the producer of the good is located, or if the value is not known and cannot be ascertained, the first ascertainable price paid for the non-originating materials in the European Union or in Mexico.

Note 5

Fibres, Printing, Basic Textile Materials and Tolerances

5.1 The term "natural fibres" is used in this Annex to refer to fibres other than artificial or synthetic fibres and is limited to the stages before spinning takes place, including waste, and, unless otherwise specified, includes fibres that have been carded, combed or otherwise processed, but not spun.

5.2 Natural fibres include horsehair of heading 0511, silk of headings 5002 and 5003 as well as wool fibres, fine or coarse animal hair of headings 5101 to 5105, cotton fibres of headings 5201 to 5203 and other vegetable fibres of headings 5301 to 5305.

5.3 The terms "textile pulp", "chemical materials" and "paper-making materials" are used in the list of product specific rules of origin to describe the materials not classified in Chapters 50 to 63, which can be used to manufacture artificial, synthetic or paper fibres or yarns.

5.4 The term "man-made staple fibres" is used in the list of product specific rules of origin to refer to synthetic or artificial filament tow, staple fibres or waste, of headings 5501 to 5507.

5.5 The term "printing" means a technique by which an objectively assessed function, such as colour, design or technical performance, is applied to a textile substrate with a permanent character, using screen, roller, digital or transfer techniques.

5.6 The term "printing (as standalone operation)" means printing combined with at least two preparatory or finishing operations (such as scouring, bleaching, mercerising, heat setting, raising, calendaring, shrink resistance processing, permanent finishing, decatizing, impregnating, mending and burling shearing, singeing, process of air-tumbler, process of stenter, milling, steam and shrinking, and wet decatizing), provided that the value of all the non-originating materials used does not exceed 50 % of the ex-works price of the good.

5.7 If for a given product in the list of product specific rules of origin a reference is made to Note 5, the conditions set out in the second column of that list shall not apply to non-originating basic textile materials used in the production of this product, which, taken together, do not exceed 8 % of the total weight of all the basic textile materials used. Note 5.9 or 5.10 may also apply.

5.8 The tolerance provided for in Note 5.7 may only apply to mixed products which have been made from two or more of the following basic textile materials:

- (a) silk;
- (b) wool;
- (c) coarse animal hair;
- (d) fine animal hair;

- (e) horsehair;
- (f) cotton;
- (g) paper-making materials and paper;
- (h) flax;
- (i) true hemp;
- (j) jute and other textile bast fibres;
- (k) sisal and other textile fibres of the genus *Agave*;
- (l) coconut, abaca, ramie and other vegetable textile fibres;
- (m) synthetic man-made filaments;
- (n) artificial man-made filaments;
- (o) current conducting filaments;
- (p) synthetic man-made staple fibres of polypropylene;

- (q) synthetic man-made staple fibres of polyester;
- (r) synthetic man-made staple fibres of polyamide;
- (s) synthetic man-made staple fibres of polyacrylonitrile;
- (t) synthetic man-made staple fibres of polyimide;
- (u) synthetic man-made staple fibres of polytetrafluoroethylene;
- (v) synthetic man-made staple fibres of polyphenylene sulphide;
- (w) synthetic man-made staple fibres of polyvinyl chloride;
- (x) other synthetic man-made staple fibres;
- (y) artificial man-made staple fibres of viscose;
- (z) other artificial man-made staple fibres;
- (aa) yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped;

- (ab) yarn made of polyurethane segmented with flexible segments of polyester whether or not gimped;
- (ac) products classified under heading 5605 (metallised yarn) incorporating strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding five millimetres, sandwiched by means of a transparent or coloured adhesive between two layers of plastic film; and
- (ad) other products classified under heading 5605.

Example: A yarn of heading 5205 made from cotton fibres of heading 5203 and synthetic staple fibres of heading 5506 is a mixed yarn. Therefore, non-originating synthetic staple fibres that do not satisfy the rule of origin (which requires manufacture from chemical materials or textile pulp) may be used up to a weight of 8 % of the yarn.

Example: A woollen fabric of heading 5112 made from woollen yarn of heading 5107 and synthetic yarn of staple fibres of heading 5509 is a mixed fabric. Therefore, synthetic yarn which does not satisfy the rule of origin (which requires manufacture from chemical materials or textile pulp) or woollen yarn that does not satisfy the rule of origin (which require manufacture from natural fibres, not carded or combed or otherwise prepared for spinning) or a combination of both may be used provided their total weight does not exceed 8 % of the weight of the fabric.

Example: Tufted textile fabric of heading 5802 made from cotton yarn of heading 5205 and cotton fabric of heading 5210 is only a mixed product if the cotton fabric is itself a mixed fabric being made from yarns classified in two separate headings or if the cotton yarns used are themselves mixtures.

Example: If the tufted textile fabric concerned had been made from cotton yarn of heading 5205 and synthetic fabric of heading 5407, then, obviously, the yarns used are two separate basic textile materials and the tufted textile fabric is accordingly a mixed product.

5.9 If for a given product a reference is made to Note 5, the conditions set out in the second column of the list in Section B shall not apply to yarn made of polyurethane segmented with flexible segments of polyether whether or not gimped if the non-originating yarn does not exceed 8 % of the total weight of all the basic textile materials used.

5.10 If for a given product a reference is made to Note 5, the conditions set out in the second column of the list in Section B shall not apply to the strip consisting of a core of aluminium foil or of a core of plastic film whether or not coated with aluminium powder, of a width not exceeding five millimetres, sandwiched by means of an adhesive between two layers of plastic film when the non-originating strip does not exceed 30 % of the total weight of all the basic textile materials used.

Note 6

Other Tolerances Applicable to Certain Textile Materials

6.1 If reference to Note 6 is made in the list of product specific rules of origin in Section B, textile materials may be used, with the exception of linings and interlinings, which do not satisfy the requirements set out in the second column for the made-up textile product, provided that those materials are classified under a heading other than that of the product and that their value does not exceed 8 % of the ex-works price of the product.

6.2 Without prejudice to Note 6.3, materials which are not classified under Chapters 50 to 63 may be used freely in the production of textile products, whether or not they contain textiles.

Example: If a rule in the list provides that for a particular textile item, such as trousers, yarn must be used, this does not prevent the use of metal items, such as buttons, because buttons are not classified in Chapters 50 to 63. For the same reason, it does not prevent the use of slide-fasteners even though slide-fasteners normally contain textiles.

6.3 If a percentage rule applies, the value of materials which are not classified under Chapters 50 to 63 shall be taken into account when calculating the value of the incorporated non-originating materials.

Note 7

Agricultural Goods

7.1 Agricultural goods classified under Section II of the Harmonized System and heading 2401, which are grown or harvested in the territory of a Party, shall be treated as originating in the territory of a Party, even if grown from seeds, bulbs, rootstock, cuttings, slips, grafts, shoots, buds, or other live parts of plants imported from a third-country.

Note 8

Definition of Processes

8.1 "Chemical reaction" means a process, including a biochemical process, which results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

For the purposes of this definition, the following are not considered chemical reactions:

- (a) the dissolution in water or other solvents;
- (b) the elimination of solvents including solvent water; or
- (c) the addition or elimination of water of crystallisation.

8.2 "Mixing and blending" means the deliberate and proportionally controlled mixing or blending, including dispersing, of materials, other than the addition of diluents, to conform to predetermined specifications which results in the production of a good having physical or chemical characteristics that are relevant for the purposes or uses of the good and are different from the input materials.

8.3 "Purification" means a process which results in the elimination of at least 80 % of the content of existing impurities, or the reduction or elimination of impurities resulting in a good suitable for one or more of the following applications:

- (a) pharmaceutical, medical, cosmetic, veterinary or food grade substances;
- (b) chemical products and reagents for analytical, diagnostic or laboratory uses;
- (c) elements and components for use in micro-electronics;
- (d) specialised optical uses;
- (e) biotechnical use, for example, in cell culturing, in genetic technology or as a catalyst;
- (f) carriers used in a separation process; or
- (g) nuclear grade uses.

8.4. "Change in particle size" means the deliberate and controlled modification in particle size of a product, other than by merely crushing or pressing, resulting in a good with a defined particle size, defined particle size distribution or defined surface area, which is relevant for the purposes of the resulting product and with physical or chemical characteristics different from those of the materials used.

8.5. "Production of standard materials" (including standard solutions) means a production of a preparation suitable for analytical, calibrating or referencing uses with precise degrees of purity or proportions certified by the manufacturer.

8.6. "Isomer separation" means the isolation or separation of isomers from a mixture of isomers.

8.7. "Biotechnological processes" means:

(a) biological or biotechnological culturing (including cell culture), hybridisation or genetic modification of:

(i) micro-organisms, such as bacteria and viruses (including phages); or

(ii) human, animal or plant cells; and

(b) production, isolation or purification of cellular or intercellular structures (such as isolated genes, gene fragments and plasmids), or fermentation.

⁷ Precursor active cathode material (PCAM) is a chemical element, which is a precursor material to the active cathode material.

⁸ Active cathode materials (CAM) of rechargeable batteries are chemical materials and any subsequent products, which have reached the stage at which they can react chemically to produce electric energy when a battery cell is being discharged and form the positive electrode in the battery cell. The active cathode material is used in battery cell production to produce a cathode.

⁹ Cathode slurry is a mixture of active cathode material, conductive additives, binders and solvents, intended to be coated onto a current collector to get the cathode in its final form, which serves as a functional electrode in a battery cell.

² OJ EU L 84, 28.3.2002, p. 43.

4. Goods originating in Mexico classified within Chapters 1 to 97 of the Harmonized System shall benefit from the same preferential tariff treatment when imported into San Marino as they receive when imported into the European Union, as long as the Agreement on Cooperation and Customs Union between the European Economic Community and the Republic of San Marino, done at Brussels on 16 December 1991,² remains in force.

5. Chapter 3 (Rules of Origin and Origin Procedures) applies *mutatis mutandis* to the trade of goods referred to in paragraphs 1 to 4.

6. The exporter shall enter "Mexico", "Andorra" or "San Marino" in field 3 of the text of the statement on origin, depending on the origin of goods.

7. The European Union shall notify Mexico the addresses and contact information of the customs authorities responsible for verifying the statements on origin in the Principality of Andorra and the Republic of San Marino.

8. If the competent governmental authority of the Principality of Andorra or the Republic of San Marino does not comply with the provisions of Chapter 3, Mexico may take the case to the Sub-Committee on Customs, Trade Facilitation and Rules of Origin established by Article 1.10.1(d) (Sub-Committees and Other Bodies of Part III of this Agreement), in order to determine appropriate measures for resolving the issue.

EXPLANATORY NOTES

Article 3.14 (Non Alteration)

1. If the exporter did not know the final destination of specific goods included in the consignment at the time of export, the importer shall present a statement on origin issued after the exportation.
2. The importer may prove that the goods which were in transit through the territory of a third country (with or without trans-shipment or temporary storage) were under the surveillance of the customs authorities of such territories. On request of the customs authorities of the importing Party, the importer has to present the following documentation:
 - (a) transport documents, such as airway bill, bill of lading or road consignment note, as the case may be, that records the date and place of shipment of the goods and the port, the airport or point of entry at the final destination, if the goods were in transit through the territory of one or more third countries without trans-shipment or temporary storage;
 - (b) transport documents, such as airway bill, bill of lading or road consignment note, as the case may be, or the combined transport document, if the goods were in transit through the territory of one or more third countries, with trans-shipment in such territories and not being subject to temporary storage; or

(c) a copy of the documents that provide evidence that the goods remained under surveillance of the customs authority where the goods that were in transit through the territory of one or more third countries were subject to trans-shipment and temporary storage.

3. In the absence of any of the documents referred to in paragraph 2, the importer may provide any other supporting document.

Article 3.18 (Conditions for Making Out a Statement on Origin)

4. Statements on origin have to be made out by an exporter established in the territory of one of the Parties. If the invoice is made out in a third country, the statement on origin shall be made out on any other commercial document¹ issued in the territory of the exporting Party, which describes the goods concerned in sufficient detail to enable them to be identified as originating in accordance with Chapter 3 (Rules on Origin and Origin Procedures). In such a case, the exporter of the goods must be identified on the document on which the statement on origin is made out.

5. The wording of the statement on origin shall be in accordance with the wording set out in Annex 3-B (Text of the Statement on Origin).

6. The statement on origin should not contain an indication of non-originating goods which are not covered by the statement on origin. Such indication should appear on the invoice in a precise way to avoid any misunderstandings.

¹ Those commercial documents are for instance the delivery note or packing list which accompany the goods.

7. Statements on origin made out on photocopied invoices or commercial documents are acceptable provided such statements bear the signature of the exporter under the same conditions as the original.
8. A statement on origin made out on the reverse of the invoice or commercial document is acceptable.
9. A statement on origin made out on a separate sheet of the invoice is acceptable provided that the sheet is obviously part of the invoice. A complementary form may not be used.
10. A statement on origin made out on a label, which is subsequently attached to the invoice is acceptable provided there is no doubt that the label has been affixed by the exporter. For example, the exporter's signature covers both the label and the invoice.

EXPROPRIATION

The Parties confirm their shared understanding that:

1. A measure or series of measures by a Party cannot constitute an expropriation unless it interferes with a tangible or intangible property right or property interest in an investment.
2. Article 10.18 addresses:
 - (a) direct expropriation, which occurs when a covered investment is nationalised or otherwise directly expropriated through formal transfer of title or outright seizure; and
 - (b) indirect expropriation, which occurs when a measure or series of measures by a Party has an effect equivalent to direct expropriation, in that it substantially deprives the investor of the fundamental attributes of property in its investment, including the right to use, enjoy and dispose of its investment, without formal transfer of title or outright seizure.

3. The determination of whether in a specific situation a measure or series of measures by a Party constitutes an indirect expropriation requires a case-by-case, fact-based inquiry that considers, among other factors:

- (a) the economic impact of the measure or series of measures, although the fact that a measure or series of measures by a Party has an adverse effect on the economic value of an investment, standing alone, does not establish that an indirect expropriation has occurred;
- (b) the duration of the measure or series of measures by a Party;
- (c) the extent to which the measure or series of measures interferes with the distinct and reasonable expectations of the investor arising out of the investment; and
- (d) the character of the measure or series of measures, in particular their object and context.

5. For greater certainty, non-discriminatory measures of a Party that are designed and applied to achieve legitimate policy objectives, such as public health, social services, public education, safety, environment, public morals, social or consumer protection, privacy and data protection, the promotion and protection of cultural diversity, or competition, do not constitute indirect expropriations, except in the rare circumstance when the impact of a measure or series of measures is manifestly excessive in light of its purpose.

PUBLIC DEBT

1. The parties recognise that the purchase of debt of a Party entails commercial risk. For greater certainty, no award shall be made in favour of a claimant for a claim under Section D with respect to a default or non-payment of debt of a Party unless the claimant meets its burden of proving that such default or non-payment constitutes a breach of an obligation under Section C.
2. No claim that a restructuring of debt of a Party breaches an obligation under this Chapter shall be submitted or, if already submitted, be pursued under Section D if the restructuring is a negotiated restructuring at the time of submission, or becomes a negotiated restructuring after such submission, except for a claim that a negotiated restructuring falling under paragraph 4(a)(ii) of this Annex breaches Article 10.7 or 10.8¹.
3. Notwithstanding Article 10.26, and subject to paragraph 2 of this Annex, an investor shall not submit a claim under Section D that a restructuring of debt of a Party breaches Article 10.7 or 10.8 or an obligation under Section C unless 270 days have elapsed from the date of submission by the claimant of the written request for consultations pursuant to Article 10.22.

¹ For greater certainty, a breach of Article 10.7 or 10.8 does not occur merely by virtue of a different treatment provided by a Party to certain categories of investors or investments, including such treatment as resulting from differences in the situations of the investors and their investments which may occur due to differences in the characteristics of a particular debt instrument, on the grounds of different macroeconomic impact, for instance, to avoid systemic risks or spillover effects.

4. For the purposes of this Annex:

- (a) "negotiated restructuring" means the restructuring or rescheduling of debt of a Party that has been effected through:
 - (i) a modification or amendment of debt instruments, as provided for under their terms, including their governing law;² or
 - (ii) a debt exchange or other similar process in which the holders of no less than 75 % of the aggregate principal amount of the outstanding debt subject to restructuring have consented to such debt exchange or other process;
- (b) "governing law" of a debt instrument means a jurisdiction's legal and regulatory framework applicable to that debt instrument;
- (c) for greater certainty, "debt of a Party" includes, in the case of Mexico, "public debt of Mexico" as defined in its domestic law and, in the case of the European Union, any form of debt of the European Union or of a government of a Member State of the European Union at the central, regional or local level.

² For greater certainty, this may include the exchange of debt instruments.

GUIDELINES FOR MUTUAL RECOGNITION AGREEMENTS

SECTION A

General Provisions

Introduction

1. This Annex contains guidelines to facilitate the negotiation of Mutual Recognition Agreements (hereinafter referred to as "MRAs") by the Parties and the development of joint recommendations by the relevant professional bodies or authorities, respectively, with respect to regulated professions. These guidelines are non-binding and they do not modify or affect the rights and obligations of the Parties under this Agreement.

Definitions

2. For the purposes of this Annex:
- (a) "adaptation period" means a period of supervised practice, possibly accompanied by further training, of a regulated profession in the host jurisdiction under the responsibility of a qualified person and subject to an assessment;¹

¹ The detailed rules governing the adaptation period, its assessment and the professional status of the person under supervision shall be set out, as appropriate, in the host jurisdiction's law.

- (b) "aptitude test" means a test limited to the professional knowledge of applicants, made by the relevant authorities of the host jurisdiction with the aim of assessing the ability of applicants to pursue a regulated profession in that jurisdiction; and
- (c) "scope of practice" means an activity or group of activities covered by a regulated profession.

SECTION B

Form and Content of the MRA

1. This Section sets out various issues that may be addressed in a negotiation and, if so agreed, included in a final MRA. It outlines elements that might be required of professionals of the other Party seeking to benefit from an MRA.

Participants

2. The parties to the MRA should be clearly stated.

Purpose of the MRA

3. The purpose of the MRA should be clearly stated.

Scope of the MRA

4. The MRA should clearly set out:

- (a) the scope of the MRA, in terms of the specific professional titles and activities which it covers;
- (b) who is entitled to use the professional titles concerned;
- (c) whether the recognition mechanism is based on formal qualifications, a licence obtained in the jurisdiction of origin, or on some other requirement; and
- (d) whether the MRA allows permanent or temporary access to the profession concerned.

Mutual Recognition Provisions

- 5. The MRA should clearly specify the conditions to be met for the recognition of qualifications in each jurisdiction and the level of equivalence agreed.
- 6. Different sets of requirements could be considered for permanent and for temporary project-based access to the profession concerned.

Mechanisms for Implementation

7. The MRA should state:

- (a) the rules and procedures to be used to monitor and enforce the provisions of the MRA;
- (b) the mechanisms for dialogue and administrative cooperation between the parties to the MRA;
and
- (c) the means for individual applicants to address any matters arising from the interpretation or implementation of the MRA.

8. As a guide to the treatment of individual applicants, the MRA should include details on:

- (a) the point of contact for information on all issues relevant to the application, for example, the name and address of the relevant authorities, licensing formalities and information on additional requirements which need to be met in the host jurisdiction;
- (b) the duration of the procedures for the processing of applications by the relevant authorities of the host jurisdiction;
- (c) the documentation required of applicants and the form in which it should be presented;

- (d) acceptance of documents and certificates issued in the home jurisdiction in relation to qualifications and licensing; and
- (e) the procedures of appeal to or review by the relevant authorities.

9. The MRA should also include the commitments from the relevant authorities that:

- (a) requests about the licensing and qualification requirements and procedures will be promptly dealt with;
- (b) adequate time will be provided for applicants to complete the requirements of the application process and of any appeal to or review by the relevant authorities;
- (c) exams or tests will be arranged with reasonable frequency;
- (d) fees for applicants seeking to take advantage of the terms of the MRA will be commensurate with the costs incurred by the host jurisdiction; and
- (e) information will be supplied on any assistance programmes in the host jurisdiction for practical training, and any commitments of the host jurisdiction in that context.

Licensing and Other Provisions in the Host Jurisdiction

10. If applicable, the MRA should also set out the means by which, and the conditions under which, a licence is obtained following the determination of eligibility and what a licence entails, for example, a licence and its contents, membership of a professional body or use of professional or academic titles. Any licensing requirements other than qualifications should be explained, including requirements relating to:

- (a) having an office address, maintaining an establishment or being a resident;
- (b) language skills;
- (c) proof of good character;
- (d) professional indemnity insurance;
- (e) compliance with host jurisdiction's requirements for use of trade or firm names; and
- (f) compliance with host jurisdiction ethics, for example, independence and good conduct.

11. To ensure transparency, the MRA should include the following details for each host jurisdiction:

- (a) the relevant law to be applied, for example, regarding disciplinary action, financial responsibility or liability;
- (b) the principles of discipline and enforcement of professional standards, including disciplinary jurisdiction and any consequential effects on practicing professional activities;
- (c) the means for the ongoing verification of competence; and
- (d) the criteria for, and procedures relating to, revocation of the registration.

Revision of the MRA

12. If the MRA includes terms under which it can be reviewed or revoked, the details thereof should be clearly stated.

Transparency

13. The Parties should:

- (a) make publicly available the text of MRAs which have been concluded; and

- (b) notify each other of any modifications to qualifications that may affect the application or implementation of an MRA and, if possible, be given an opportunity to comment on the modifications of the other Party.

SECTION C

Four-Step Process for the Recognition of Qualifications

- 14. The following four-step process should be considered to simplify and facilitate the recognition of the qualifications.

Step One: Verification of Equivalency

- 15. The negotiating entities should verify the overall equivalence of the scope of practice or qualifications of the regulated profession in their respective jurisdictions.

- 16. The examination of qualifications should include the collection of all relevant information pertaining to the scope of practice rights related to a legal competency to practice or to the qualifications required for a specific regulated profession in the respective jurisdictions.

17. The negotiating entities should:

- (a) identify activities or groups of activities covered by the scope of practice rights of the regulated profession; and
- (b) identify the qualifications required in each jurisdiction, which may include the following elements:
 - (i) the minimum level of education required, for example, entry requirements, length of study and subjects studied;
 - (ii) the minimum level of experience required, for example, location, length and conditions of practical training or supervised professional practice prior to licensing, or the framework of ethical and disciplinary standards;
 - (iii) examinations passed, especially examinations of professional competency;
 - (iv) the extent to which qualifications from one jurisdiction are recognised in the other jurisdiction; and

- (v) the qualifications which the relevant authorities in each jurisdiction are prepared to recognise, for instance, by listing particular diplomas or certificates issued, or by reference to particular minimum requirements to be certified by the relevant authorities of the jurisdiction of origin, including whether the possession of a certain level of qualification would allow recognition for some activities of the scope of practice but not others such as level and length of education, major educational focuses and overall subjects and areas.

18. There is an overall equivalence between the scope of practice rights or the qualifications of the regulated profession if there are no substantial differences in this regard between jurisdictions.

Step Two: Evaluation of Substantial Differences

19. Substantial differences in the scope of qualifications required to practice a regulated profession exist, in cases of:

- (a) important differences in the essential knowledge; or
- (b) significant differences in the duration or content of the training between the jurisdictions.

20. Substantial differences in the scope of practice exist if:

- (a) one or more professional activities do not form part of the corresponding profession in the jurisdiction of origin;

- (b) those activities are subject to specific training in the host jurisdiction; and
- (c) the training for those activities in the host jurisdiction covers substantially different matters from those covered by the applicant's qualification.

Step Three: Equivalence Measures

- 21. If the negotiating entities determine that substantial differences exist in the scope of practice rights or of qualifications between the jurisdictions, they may determine equivalence measures to reduce those differences.
- 22. Equivalence measures may take the form of, among other things, an adaptation period or, if required, an aptitude test.
- 23. Equivalence measures should be proportionate to the substantial differences which they seek to address. The negotiating entities should also evaluate any practical professional experience obtained in the jurisdiction of origin to see whether this experience is sufficient to remedy, in whole or in part, the substantial differences in the scope of practice rights or qualifications between the jurisdictions, prior to determining a equivalence measure.

Step Four: Identification of the Conditions for Recognition

24. Once the assessment of the overall equivalency of the scope of practice rights or qualifications of the regulated profession is completed, the negotiating entities should specify in the MRA:

- (a) the legal competency required to practice the regulated profession;
 - (b) the qualifications for the regulated profession;
 - (c) whether equivalence measures are necessary;
 - (d) the extent to which professional experience may compensate for substantial differences; and
 - (e) a description of any equivalence measures, including the use of any adaptation period or aptitude test.
