Proposal for a
REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
amending Regulation (EU) 2024/2865 as regards dates of application and transitional
provisions

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national Parliaments,

Having regard to the opinion of the European Economic and Social Committee¹,

Acting in accordance with the ordinary legislative procedure,

¹ OJ C [...], [...], p. [...]

Whereas:

- (1) Regulation (EC) No 1272/2008 of the European Parliament and of the Council² contains certain requirements as regards the classification, labelling, and packaging of hazardous substances and mixtures. That Regulation was amended by Regulation (EU) 2024/2865 of the European Parliament and of the Council³, which *inter alia* introduced specific rules on the formatting of labels, deadlines for relabelling in case of classification changes, information requirements for advertisements and distance sales offers and labelling requirements for fuelling stations. Article 2 of Regulation (EU) 2024/2865 deferred the date of application of those rules.

² Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directives 67/548/EEC and 1999/45/EC, and amending Regulation (EC) No 1907/2006 (OJ L 353, 31.12.2008, p. 1, ELI: <http://data.europa.eu/eli/reg/2008/1272/oj>).

³ Regulation (EU) 2024/2865 of the European Parliament and of the Council of 23 October 2024 amending Regulation (EC) No 1272/2008 on classification, labelling and packaging of substances and mixtures (OJ L, 2024/2865, 20.11.2024, ELI: <http://data.europa.eu/eli/reg/2024/2865/oj>).

- (2) The 2024 Draghi report⁴ highlighted that the number and the complexity of rules risk limiting the room for manoeuvre for Union undertakings and preventing them from remaining competitive. A detailed analysis of Regulation (EC) No 1272/2008⁵ also pointed to excessive administrative burden and costs associated with requirements introduced by Regulation (EU) 2024/2865. Based on those findings, the Commission has laid down a proposal to simplify certain requirements and procedures for chemical products⁶. That proposal is, *inter alia*, intended to better balance, on the one hand, the need for label information to be clearly understood by consumers and, on the other hand, the need to reduce market barriers and administrative burden for industry⁷. In light of that proposal, it is necessary to further defer the obligations on label formatting, advertisements, distance sales offers and relabelling that were introduced by Regulation (EU) 2024/2865. Such further deferral would enable economic operators to prepare for changes to the formatting and labelling requirements, as well as new information requirements for advertisements and distance sales offers envisaged in the Commission's proposal.

⁵ Detailed analysis of costs associated with new formatting requirements is provided in the Staff Working Document Accompanying the document Proposal for a Regulation of the European Parliament and of the Council amending Regulations (EC) No 1272/2008, (EC) No 1223/2009 and (EU) 2019/1009 as regards simplification of certain requirements and procedures for chemical products, SWD(2025) 531, p. 14.

⁶ Proposal for a Regulation of the European Parliament and of the Council amending Regulations (EC) No 1272/2008, (EC) No 1223/2009 and (EU) 2019/1009 as regards simplification of certain requirements and procedures for chemical products, COM(2025) 531.

- (3) Regulation (EU) 2024/2865 introduced specific provisions for the labelling of fuels supplied at fuelling stations. However, certain requirements, including the requirement to indicate the supplier, the nominal quantity, and the unique formula identifier, appeared to be impractical and costly for undertakings, without bringing benefits to the protection of human health and the environment. For that reason, the Commission proposal as regards simplification of certain requirements and procedures for chemical products intends to modify those requirements to make them more apt by removing unnecessary and burdensome labelling requirements. In light of those anticipated modifications, it is appropriate to further defer the date of application of those requirements.
- (4) Article 2(4) and (5) of Regulation (EU) 2024/2865 contain transitional provisions that enable undertakings to apply the provisions introduced by that Regulation before the dates of their application on a voluntary basis. To ensure consistency with the longer deferral and to provide legal clarity for economic operators, it is necessary to amend the dates of application of those transitional provisions on mandatory formatting requirements, relabelling, advertisements, distance offers and labelling of fuelling stations and align those dates with the extended deferred applicability dates.
- (5) To ensure a high level of protection of human health and the environment, the application dates of other provisions of Regulation (EU) 2024/2865 should remain unchanged.
- (6) Regulation (EU) 2024/2865 should therefore be amended accordingly,

HAVE ADOPTED THIS REGULATION:

Article 1
