COMMISSION

Brussels, 17.12.2025  
SWD(2025) 432 final

**COMMISSION STAFF WORKING DOCUMENT**

**Updated Climate tracking and digital tagging of the Recovery and Resilience Plan of Spain**

*Accompanying the document*

**Proposal for a COUNCIL IMPLEMENTING DECISION**

**amending the Implementing Decision of 13 July 2021 on the approval of the assessment of the recovery and resilience plan for Spain**

{COM(2025) 794 final}

## **Updated climate tracking and digital tagging of the Recovery and Resilience Plan of Spain**

The table below presents the detailed application of the climate tracking and digital tagging methodologies set out respectively in Annexes VI and VII to Regulation (EU) 2021/241 in the modified Spanish recovery and resilience plan.

*Int. Field = intervention field.*

*Coeff. = Coefficient for the calculation of support to climate change objectives and to digital transition, on the basis of Annex VI and Annex VII of the RRF Regulation.*

*New or revised measures are marked in blue to distinguish them from the unchanged measures in the RRP.*

Measure/ Sub-Measure ID	Measure / Sub-Measure Name	Estimated costs (EUR m)	Climate		Digital	
			Int. Field	Coeff. %	Int. Field	Coeff. %
C1.I1a	Low emission zones and transformation of urban and metropolitan transport (Autonomous Community actions): line of action 1	900	048	40%		
C1.I1b.i	Development of low-emission zones and projects for the sustainable transformation of urban and metropolitan transport (municipal actions): Lines of action 2a and 2b (except for cycling infrastructure), and digitalisation (municipal actions) line of action 2d	1.190	048	40%		
C1.I1b.ii	Development of low emission zones and sustainable transformation projects for urban and metropolitan transport (municipal actions): Lines of action 2a and 2b (cycling infrastructure), and fleet transformation to zero emissions vehicles and recharging points (municipalities) line of action 2c	310	077 <sup>1</sup>	100%		

---

<sup>1</sup> This measure also includes investment in zero emission vehicles. For that part the ‘Methodology for climate tracking’ annexed to the Recovery and Resilience Facility Regulation does not set out intervention fields that would allow for climate or environmental tracking of electric vehicles or plug-in hybrid vehicles, except for vehicles for urban transport falling under intervention field 074. According to Article 18(4)(e) of the Regulation, the methodology should however ‘be used accordingly for measures that cannot be directly assigned to an intervention field listed in Annex VI’. In this context, the Commission has applied a 100% climate contribution coefficient for the zero-emission vehicles of all categories (this includes battery electric and fuel cell/hydrogen-powered vehicles) included in this measure. This measure also includes investments in cycling infrastructure (075) as well with a 100% climate coefficient.

Measure/ Sub-Measure ID	Measure / Sub-Measure Name	Estimated costs (EUR m)	Climate		Digital	
			Int. Field	Coeff. %	Int. Field	Coeff. %
C1.I1d	Improvement actions in urban environments (crossings) on the State Road Network to promote the mobility of pedestrians and cyclists, and other new forms of mobility (scooters), with the aim at reducing vehicle speed, reducing both air emissions and noise pollution: line of action 4	105	048	40%		
C1.I2	Scheme of incentives for the installation of recharging points, the purchase of electric and fuel cell vehicles and innovation in electro-mobility, recharging and renewable hydrogen	1.688	n/a <sup>2</sup>	100%		
C1.I3a	Investments in railway infrastructure	1.502	069bis	100%		
C1.I3b	Digitalisation of security, information and access control systems at railway stations providing PSO services	119	070	40%	070	100%
C2.I1.a.i	Energy rehabilitation of buildings with on average primary energy savings of at least 30 %	856	025bis	100%		
C2.I1b.i	Energy rehabilitation of buildings with on average	887	025bis	100%		

<sup>2</sup> The main part of this measure concerns incentive for the purchase of zero emission vehicles or for the development on innovative projects in zero emission vehicles/mobility The 'Methodology for climate tracking' annexed to the Recovery and Resilience Facility Regulation does not set out intervention fields that would allow for climate or environmental tracking of electric vehicles or plug-in hybrid vehicles, except for vehicles for urban transport falling under intervention field 074. According to Article 18(4)(e) of the Regulation, the methodology should however 'be used accordingly for measures that cannot be directly assigned to an intervention field listed in Annex VI'. In this context, the Commission has applied a 100% climate contribution coefficient for the zero-emission vehicles of all categories (this includes battery electric and fuel cell/hydrogen-powered vehicles) included in this measure. This measure also includes investment in alternative fuel infrastructure (077) that would also have a 100% climate coefficient.

Measure/ Sub-Measure ID	Measure / Sub-Measure Name	Estimated costs (EUR m)	Climate		Digital	
			Int. Field	Coeff. %	Int. Field	Coeff. %
	primary energy savings of at least 30 %					
C2.I1b.ii	Existing building book/Rehabilitation projects to improve energy efficiency	37	025	40%

C24.I3f	Digitalisation and boosting major cultural services: Measures to modernise public management tools and put in place an integrated system for digitisation and cataloguing of INAEM's resources, assets, structures and infrastructure	11			011	100%
C25.I1a	Programme for the promotion, modernisation and digitisation of the audiovisual sector	152			021bis	100%
C25.I3a	Spain Audiovisual Hub Fund	280			021bis	100%
C26.I1	Digitisation of the sport sector	69			011	100%
C26.I2a	Modernisation of sport facilities to improve their energy performance according to energy efficiency criteria	34	026bis	100%		
C26.I2b	Modernisation of high performance sport centres to improve their energy performance according to energy efficiency criteria	23	026bis	100%		
C26.I3a	Modernisation of sports installations to improve energy efficiency according to energy efficiency criteria	16	026bis	100%		

Measure/ Sub-Measure ID	Measure / Sub-Measure Name	Estimated costs (EUR m)	Climate		Digital	
			Int. Field	Coeff. %	Int. Field	Coeff. %
C28.I1b	Fiscal Reform Fund. Electrification of mobility	233	n/a <sup>7</sup>	40%		
C31.I1	Investment promoting self-consumption (based on renewable energy and behind-the-meter storage) and energy communities	501	029	100%		
C31.I2	Scheme to support the production and uptake of renewable hydrogen	1.600	022	100%		
C31.I3a	Subsidy scheme to support the value chain of RES and storage. Lines 1 (solar PV value chain), 2 (storage value chain) and 4 (other renewable value chains)	838	029	100%		
C31.I3b	Subsidy scheme to support the value chain of RES and storage. Line 3 Adaptation of ports for the deployment of offshore renewable energy.	162	081bis	40%		
C31.I4	Investment to support electricity network infrastructure	859	033	100%		
C31.I5	Investment to support industrial decarbonisation (grants).	422	024	40%		
C31.I6	Subsidy scheme for decarbonisation projects (grants).	509	024	40%		
C31.I9	Scheme to support the Green Transition	2.191	029	100%		

---

<sup>7</sup> This measure includes investment in hybrid and zero-emission vehicles. For this investment the ‘Methodology for climate tracking’ annexed to the Recovery and Resilience Facility Regulation does not set out intervention fields that would allow for climate or environmental tracking of electric vehicles or plug-in hybrid vehicles, except for vehicles for urban transport falling under intervention field 074. According to Article 18(4)(e) of the Regulation, the methodology should however ‘be used accordingly for measures that cannot be directly assigned to an intervention field listed in Annex VI’. In this context, the Commission has applied a 40% climate contribution coefficient for the zero-emission vehicles of all categories (this includes battery electric and fuel cell/hydrogen-powered vehicles) and the plug-in hybrid vehicles included in this measure.

Measure/ Sub-Measure ID	Measure / Sub-Measure Name	Estimated costs (EUR m)	Climate		Digital	
			Int. Field	Coeff. %	Int. Field	Coeff. %
C32-I1.a	Railway infrastructure and services	96	069	40%		
C32-I1.b	Electric vehicles	64	073	100%		
C32-I2a	Forest restoration and hydrology	12	050	40%
