Subject:	Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on European Union labour market statistics on businesses, repealing Council Regulation (EC) No 530/1999 and Regulations (EC) No 450/2003 and (EC) No 453/2008 of the European Parliament and of the Council - Preparation for the trilogue

I. INTRODUCTION

The first trilogue on the proposal for a Regulation on European Union labour market statistics on businesses (LMB Regulation), on 21 November, took place in a positive and productive spirit. As debriefed at Coreper on 22 November, substantial progress was made thanks to the constructive approach of the co-legislators and the useful contribution by the Commission. Both co-legislators share the ambition to reach a political agreement before the end of the year.

Since then, three technical meetings were held to finalise the text on topics agreed on the political level at the first trilogue. Besides the issues already agreed, landing zones were found for issues not yet discussed at the political level. The compromise text in the Annex of this Note was already circulated to delegations and discussed at the Working Party on Statistics (CWPS) on 4 December. The feedback from delegations was positive.

Based on the common understanding reached at the first trilogue, the new data requirements suggested by the European Parliament on disability, ethnic origin and migrants/cross-border workers will not be part of the scope of the LMB Regulation. It was acknowledged that the Labour Force Survey is the most suitable tool to provide data on those sensitive breakdowns.

Moreover, it was agreed that data on minimum wages and collective bargaining are to be drawn from the currently available data of Collective Pay Agreements. The calculation of the collective bargaining coverage was assigned to Eurostat while the Parliament withdrew its suggestions for additional data requirements on the level of statutory minimum wage.

On quality requirements and quality reporting, all references to low quality data sources were deleted while a broader concept of quality will apply for all sources of data. The Parliament accepted the Council's argumentation against the delegated act empowering the Commission to limit the data sources from which data may be collected and transmitted. In return, the quality reporting - which remains output-oriented - will be complemented by guidance that Eurostat will provide on the quality assessment of data sources. The evaluation itself remains under Member States' competence following the subsidiarity principle.

The subjects of safeguards and ad-hoc data were also touched upon during the first trilogue but the co-legislators could not reach a common understanding.

As regards the safeguards, the Council defended its mandate underlying the importance of predictability for both the National Statistical Authorities and the respondents. The Parliament, supported by the Commission, argued that flexibility and responsiveness are key to ensure that the production of statistics corresponds to the changing needs of the users.

II. PROPOSAL FOR A WAY FORWARD

In order to ensure the right balance between predictability and flexibility, a possible way forward would be to depart from strict quantitative safeguards but reinforce the qualitative ones following a principle-based approach. If that direction was pursued, the provisions would include clear references to the need to avoid additional burden on the respondents and to the necessity for EU-financed feasibility or pilot studies which would have to be carried out before any delegated or implementing act would be proposed.

These sound and strong principle-based safeguards would guarantee that National Statistical Authorities and respondents can work in a cost-and-burden efficient way. At the same time, they would ensure flexibility for future data needs. In general, it is important to reflect in the text that - apart from National Statistical Authorities - burden should not be imposed on the respondents which, in the case of LMB, are the enterprises. Hence, emphasis should also be put on reducing the response burden by deleting data requirements that are no longer needed.

The requirements under Article 7 for ad-hoc data cannot be accepted by the Council. If an agreement cannot be reached without including a tool for one-off additional data needs, the Council could consider to include a delegated and an implementing act under Article 4, both dedicated particularly to temporary production of data. Still, those acts would have to remain within the domains and topics already included in the Annex and could not result in an obligation for new statistical surveys on businesses. The Commission should be allowed to present this type of delegated acts only once every two years and not before 2030 as a reference year. The same conditions as for the rest of the delegated and implementing acts of Article 4 would have to apply, therefore references on the burden on the respondents would be included and EU-financed feasibility or pilot studies would have to be carried out ahead of any delegated or implementing act.

The subjects of Back data, Derogations, Financing, Feasibility studies and Requirement for the processing of personal data are still to be discussed on the political level, however at the technical meeting the following ways forward were identified.

Different derogation periods for each type of data collection depending on the periodicities: For multi-annual data collections, a 4-year derogation would apply (as in the Council mandate), while a 2-year derogation would apply for annual and quarterly data collections. An extension of the one-year period would apply in justified cases independent from the periodicity.

To avoid duplication of the quarterly index of labour cost and hours worked, the Commission intends to propose deleting them from the Short-Term Statistics (which are currently under revision). Until then, both indexes would be provided via the LMB but only on a voluntary basis.

Since feasibility studies would be used as a tool to test the feasibility of new data initiatives for either delegated or implementing acts, their scope would be amended to explicitly include a reference to the feasibility of delegated and implementing acts.

The Council will insist on the deletion of the Parliament's suggestion for an additional delegated act on the specification of roles and responsibilities of actors conducting the studies. In addition, the reference to the recommendation suggesting integrating the results of pilot studies in the regular data production in the report of the Commission should also be withdrawn.

The reference on mandatory financing from the Single Market Programme should remain in the text. A reference to the possibility for financial contribution from the general budget of the Union would be added.

Lastly, the Council could accept a reference on back data in the recitals while the definition and the rest of the references in the operative part should be deleted.

References to data protection are to be streamlined throughout the text.

III. NEXT STEPS

With a view to the second Trilogue on the proposal for a Regulation on European Union labour market statistics on businesses, the Committee of Permanent Representatives is invited to:

- examine the Presidency's compromise suggestions as described above; and
- agree on a revised mandate to the Presidency to continue negotiations with the European Parliament, on the basis of the compromise texts as set out in the Annex of this Note.

**Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on
European Union labour market statistics on businesses, repealing Council Regulation (EC) No 530/1999
and Regulations (EC) No 450/2003 and (EC) No 453/2008 of the European Parliament and of the Council
